Chapter 1

principles

1.1 misc

1.1.1 cuebids

- if no agreement, cue shows strength and at in many situations GF
- show stop if two unbid suit or opp. bid two suits, and both cuebids are available. otherwise ask stop
- if one cuebid is unavailable, assume the stopper is good

1.1.2 artificial / forcing bid interfered

- general art bid doubled: XX = suggests play. accept transfer = min (so P = mild inv). others = system ON.
- fit cue doubled: XX = Q. bid = don't worry. P = otherwise.
- two-suited bid doubled: P = pick better one. XX = suggest play.

1.1.3 unusual NT vs t/o

if unusual NT and t/o have the same meaning, then NT empathizes distrbitional hands.

1.1.4 unnessesary jump

in non-contested auction: splinter to the last real suit or ERKC. otherwise natural. however should be fit-showing above 2N for passed hand

1.1.5 forcing or not

when opp. inv+ or we are defensive side and they opened and responded, new suit tend to be NF.

1.1.6 fast arrival

fast arrival unless double jump to game after GF (1M - 2X; 2Y - 4M is a picture jump).

1.2 doubles

```
low-level double is not penalty unless:  
XX set up FP  
after someone doubled 1N for pen; or convert a t/o to pen  
no game interest, and deny some suit (or already fit) so that t/o is  
    not possible  
obvious case
```

```
XX is strength / suggest play unless:  
after low-level X converted to penalty: XX is SOS  
3N in a competitive auction doubled # XX = plz re-consider
```
